

# KNOWLEDGE & EXPERIENCE

**O**ur goal is to educate the community on one of the most important health problems facing men and women ... HEART DISEASE. Detecting heart disease early with revolutionary imaging technology is considered an ideal screening tool in revealing early coronary artery disease. Managing disease in its early stages can reduce the need for invasive studies and high medical costs. Our Center has 15 years of experience and we have scanned more than 40,000 Southern Californians.

### Diagnostic and Screening Services:

- HEART SCAN YOU SAVE \$100!** ..... (Reg. \$395) **Your Price \$295**
